DETAILED ACTION

Allowable Subject Matter

Claims 8-19 are allowed.

The following is an examiner's statement of reasons for allowance:

Regarding claim 8, the prior art, as best exemplified by US Pre Grant Publication to Dautartus et al., number 2003/0095759, teaches a method for making a ferrule (Figure 1A, element 120) for an optical fiber connector (page 3, paragraph 39) comprising the steps of: forming a plurality of greensheets from ceramic material (page 3, paragraph 39), stacking the plurality of greensheets together to a desired thickness having a top, bottom, front and rear sides and opposed sides (Figure 1A and page 3, paragraph 39), laminating the stack (page 3, paragraph 39), and sintering (firing) the laminating stack to form an optical connector ferrule (page 3, paragraph 39). Dautartus does not teach the step of forming optical fiber through openings in the stack extending through the top layer to the bottom layer in the desired pattern. Furthermore, Dautartus, either alone or in combination with the other prior art of record, does not disclose or render obvious the step of forming optical fiber through openings in the stack extending through the top layer to the bottom layer in the desired pattern.

Claims 9-15 are allowed based on dependence from allowed base claim 8.

Regarding claim 16, Dautartus teaches a method for making a ferrule (Figure 1A, element 120) for an optical fiber connector (page 3, paragraph 39) comprising the steps of: forming a plurality of ferrule layers from a ceramic material greensheet (page 3,

paragraph 39), stacking the ferrule layers to a desired thickness having a top, bottom, front and rear sides and opposed sides (Figure 1A and page 3, paragraph 39), and securing the layers to hold the stack together (by laminating and firing, page 3, paragraph 39). Dautartus does not teach the step of forming optical fiber through openings in the stack extending through the top layer to the bottom layer in the desired pattern. Furthermore, Dautartus, either alone or in combination with the other prior art of record, does not disclose or render obvious the step of forming optical fiber through openings in the stack extending through the top layer to the bottom layer in the desired pattern.

Claims 17-19 are allowed based on their dependence from allowed base claim 16.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
